Human Computer Interaction

7th Semester Project

Our Team

Pranav Jagdish - PES1201700340

Dhruv Srikanth - PES1201700661

Shobith Nandakumar - PES1201700507

Problem Statement

- At a time when human connection is most needed and uncertainty is the new normal, patients, doctors and the rest of us must isolate to keep safe.
- **Covimeet** is a user platform to connect Covid affected people from around the globe. Share your stories, document your experience and persevere as a community!

User Interviews and Needfinding Insights

For this project, we interviewed:

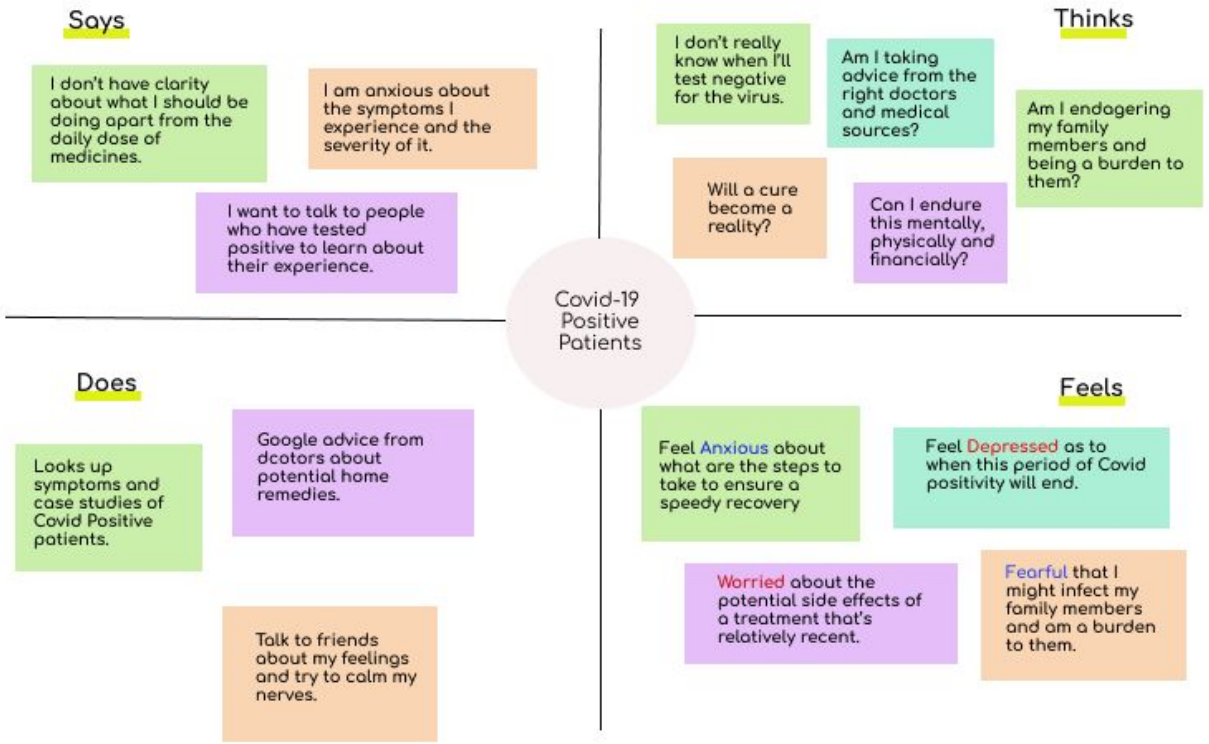
- Covid-19 Patients
- Covid-19 Affected People

to get a thorough picture of how the virus affects families emotionally.

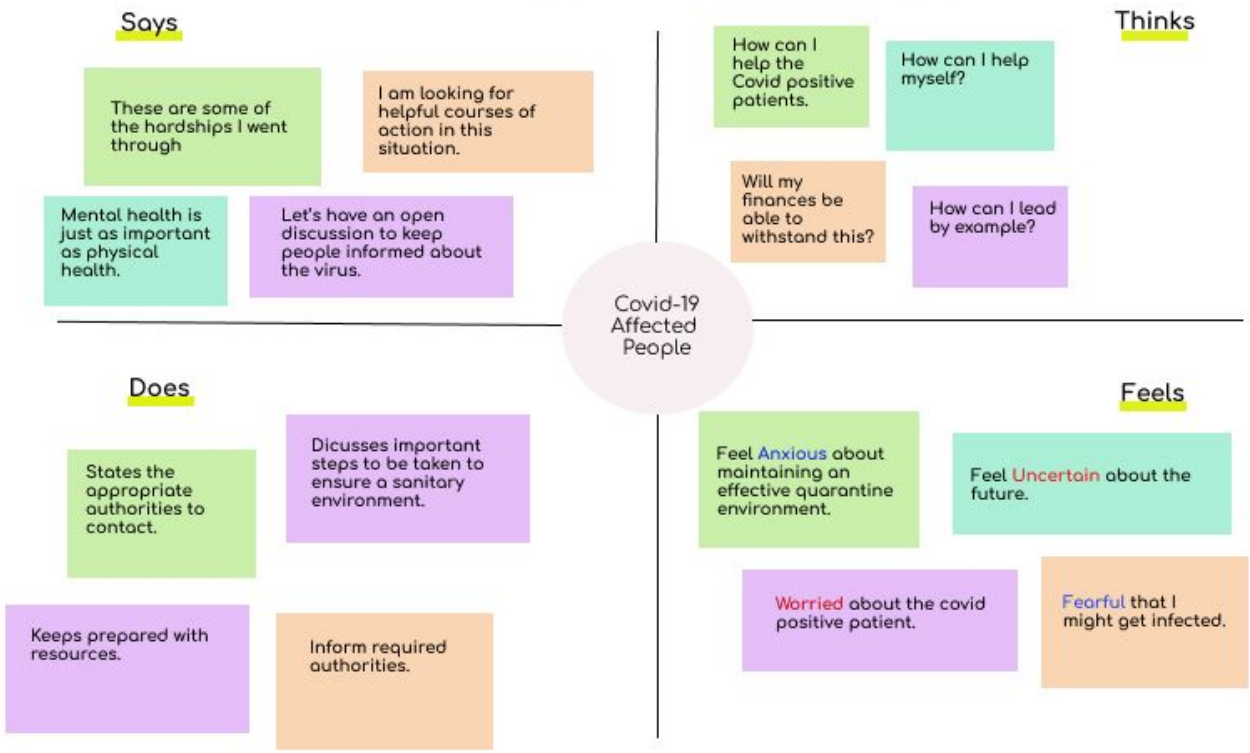
Insights:

- Anxious Googling
- Lack of connection to other patients

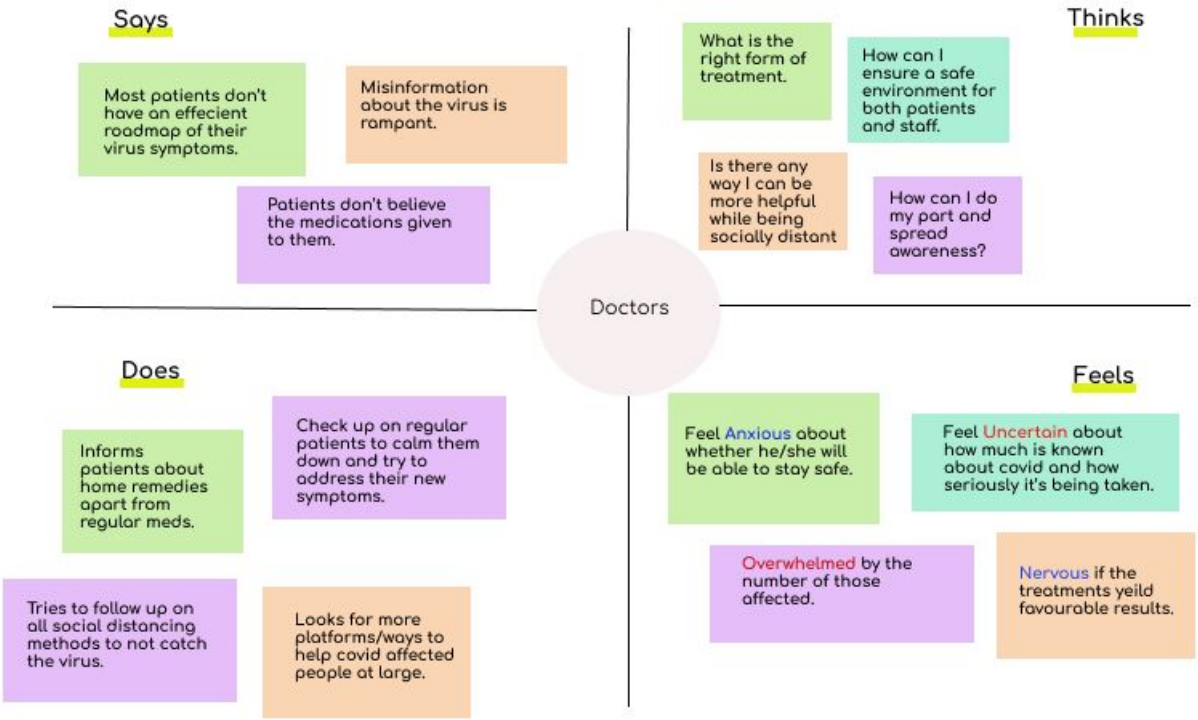
Covid Positive Patients



People Affected By Covid

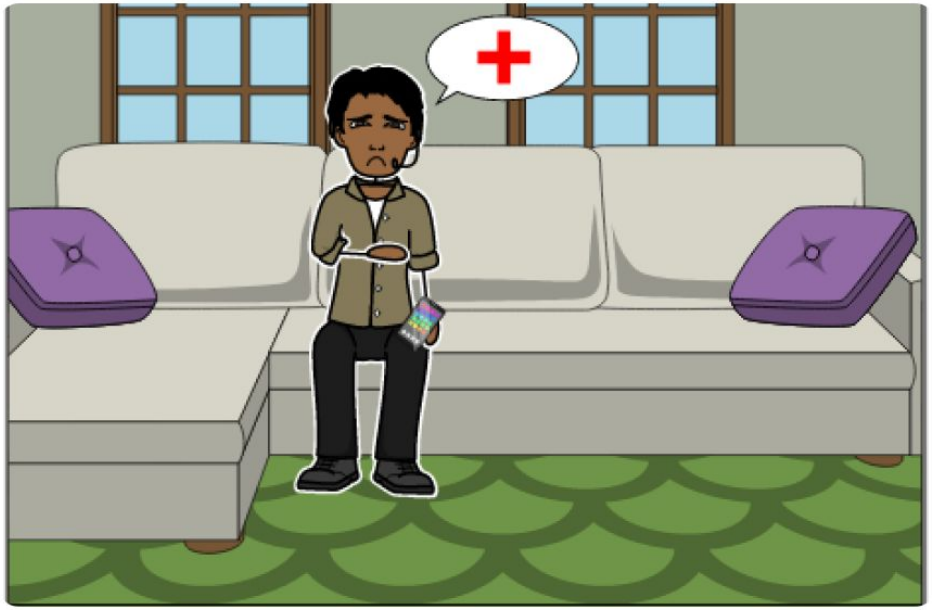


Doctors



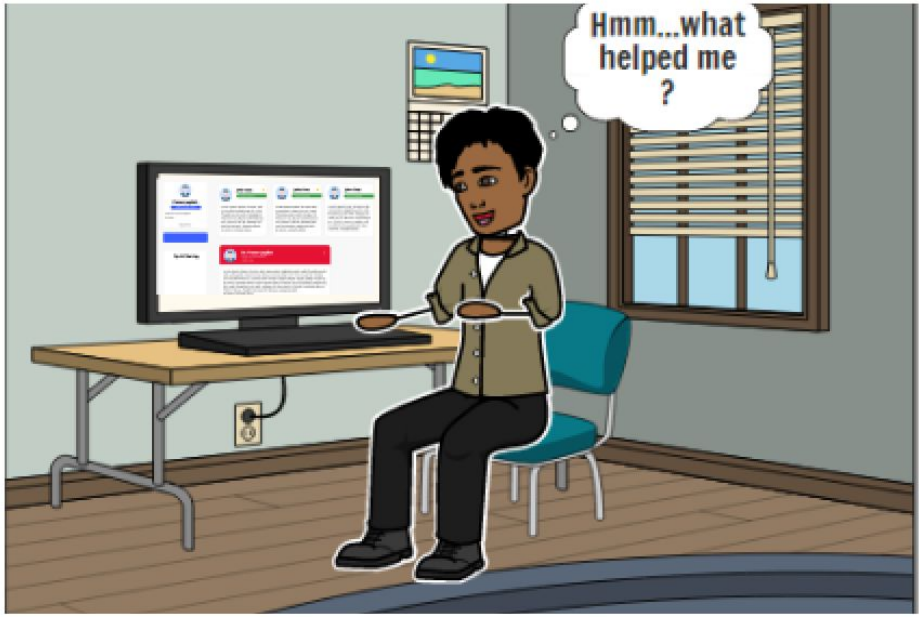
Says
Most patients don't have an effecient roadmap of their virus symptoms.
Misinformation about the virus is rampant.
Patients don't believe the medications given to them.
Thinks
What is the right form of treatment.
How can I ensure a safe environment for both patients and staff.
Is there any way I can be more helpful while being socially distant
How can I do my part and spread awareness?
Doctors
Does
Informs patients about home remedies apart from regular meds.
Check up on regular patients to calm them down and try to address their new symptoms.
Tries to follow up on all social distancing methods to not catch the virus.
Looks for more platforms/ways to help covid affected people at large.
Feels
Feel Anxious about whether he/she will be able to stay safe.
Feel Uncertain about how much is known about covid and how seriously it's being taken.
Overwhelmed by the number of those affected.
Nervous if the treatments yeild favourable results.

Aman tests positive for the Covid virus and is now self-isolating to ensure that he doesn’t infect his family members.



After talking to the family doctor and getting the first dose of medicines, Aman feels a fever and isn’t sure what to do or who to call. The uncertainty and lack of credible information is overwhelming.

After a stressful 8 days in quarantine, Aman turns to the internet. In comes CoviMeet, a virtual community platform for Covid patients to talk about their journey and experience. Even doctors log on to talk about helpful tips to stay positive and beat Covid-19.



Aman creates an account & sees Dr. Nagarjun Rao's post on a fever developing in a minority of patients after the first round of medicines. He understands there's nothing to worry about and feels relieved. He then posts about his experience with the virus!
